SUMMARY

Final-year computer science engineer at SRM, Chennai, and a freelance builder for startups, companies and individuals since 2024. I design agentic AI systems, train and deploy models, and ship the product around them: backend, frontend, tests and infrastructure. 7 IEEE conference papers, 17+ freelance clients, 40+ hackathons.

EDUCATION

SRM Institute of Science and Technology, Kattankulathur, Chennai 2023 – 2027

B.Tech, Computer Science and Engineering (Software Engineering) · CGPA 8.92 · all subjects cleared on first attempt

EXPERIENCE

Freelance Full-Stack and AI/ML Engineer · 17+ clients 2024 – Present

Apps, dashboards, fintech features, ML models and prediction systems for enterprises, startups and individuals; client names under NDA.

Software Development Engineer Intern · Shristi Infrastructure Development Ltd. Jun 2026 – Aug 2026

Built internal tooling around the company's Farvision ERP workflows for project, CRM and finance teams.

Business Analyst Intern · Brightforge Labs Feb 2026 – Apr 2026

Gathered requirements from stakeholders and wrote them up as user stories and acceptance criteria.

AI/ML Intern · Google AI/ML Virtual Internship (EduSkills) Dec 2025 – Mar 2026

Trained and evaluated vision and tabular models in TensorFlow and Keras.

Azure Intern · Microsoft Elevate Jan 2026 – Feb 2026

Deployed and configured services on Azure, including identity and access setup.

AI Intern · 1M1B × AICTE × IBM Dec 2025 – Jan 2026

Cleaned and analysed sustainability datasets in Python.

IT Intern · Shristi Infrastructure Development Ltd. Dec 2025 – Jan 2026

Supported Farvision ERP for 50+ business users across CRM, finance and project modules. (ERP users supported: 50+, Systems troubleshot: 20+)

Software Developer Intern · Bluestock Fintech Oct 2025 – Nov 2025

Built React dashboard modules consuming REST APIs for financial analytics.

Software Engineer Intern · HCDS Techh Aug 2025 – Nov 2025

Designed and built REST APIs and backend services in Node.js and Express.

Python Developer Intern · TechCorp Jul 2025 – Aug 2025

Wrote Python services and automation scripts for internal workflows.

Full-Stack Developer Intern · Codtech IT Solutions Apr 2025 – Jun 2025

Built full-stack apps in React, Node.js and Express with JWT authentication and role-based access.

Java Developer Intern · TechnoHacks Feb 2025 – Apr 2025

Built Java backend modules with object-oriented design and MySQL-backed CRUD services.

PROJECTS

ClinDocMicro — Offline agentic clinical NLP for rural clinics. 2026

Turns a photographed paper prescription or discharge note into a structured FHIR record, entirely on a 4 GB CPU laptop with no internet. *PaddleOCR, GLiNER, Phi-3-mini, llama.cpp, FHIR R4B, FastAPI*

Bulwark — Five fraud agents, one auditable verdict, under 100 ms. code

An agentic fraud intelligence platform modelled on a real fraud desk. Agents per decision: 5; Decision latency: < 100 ms; Test suite: 30 tests, ~2 s. *FastAPI, PyTorch, NetworkX, PostgreSQL, Redis, Next.js*

Marginalia — A research system where agents argue before they answer. code

A multi-agent research system that treats a query as a subject for deliberation. *Python, LLM agents, ChromaDB, SQLite, WebSocket, React*

Business Entity Resolution — 1.7M records matched against 10M+, CPU-only, offline. code

Built for the Amazon ML Challenge 2026. Public leaderboard macro F0.5: 0.9628; Out-of-fold F0.5: 0.9617; Blocking recall: 95.59%. *Python, LightGBM, Inverted indexes, Transliteration, GitHub Actions*

TestHarness — A test framework that measures its own value. code

Ships with a realistic system under test (a container-terminal gate-appointment app) containing six switchable defects. Tests per verify: 540 JVM + 32 Vitest; Mutation score, domain rules: 100%; Booking flow p95 at 60 users: 73 ms. *Java 21, Selenium Grid, REST Assured, Cucumber, Pact, Gatling*

MedGraph-RAG — Graph retrieval for medical literature, at a third of the tokens. code

A knowledge graph built from more than two million tokens of biomedical literature: genes, proteins, pathways, drugs and their interactions. Tokens per query vs LLM-only: −67.8%; LLM-judge pass rate: 93%; Latency: 50% faster. *TigerGraph, GraphRAG, Python, GPT-4o-mini, BERTScore*

RESEARCH AND RECOGNITION

7 IEEE conference papers (AutoGenAI, VitalMind, Vortex, ChainGuard, Job Portal, Fake News Detection, Cryptocurrency Price Prediction); IGI Global chapter; UROP UR2526CI302 on physics-informed networks.

2× National Hackathon Winner · EY Techathon 6.0, semifinalist · Guidewire DevTrails, semifinalist · Amazon ML Challenge 2026 · OBSCURA at Codorra 2026, quarterfinalists · Team lead, VORTEXXX · Tata InnoVent-27 · 40+ hackathons.

SKILLS

Agentic AI and GenAI: LLM agents, Multi-agent systems, Tool calling, RAG, GraphRAG, LangChain, LlamaIndex, Prompt engineering, Evaluation, Phi-3, llama.cpp, Ollama, OpenAI API, Anthropic API, Hugging Face

Machine learning: PyTorch, TensorFlow, Keras, scikit-learn, LightGBM, XGBoost, Computer vision, YOLOv8, OpenCV, NLP, BERT, GLiNER, PINNs, Time series, SHAP

MLOps: ONNX Runtime, FastAPI serving, Docker, MLflow, Prometheus, GitHub Actions, Model monitoring

Languages: Python, TypeScript, JavaScript, Java, C++, SQL, Solidity, C, PHP, Bash

Web and backend: Next.js, React, Node.js, Express, Spring Boot, Tailwind CSS, REST, WebSocket, JWT, Expo

Data: PostgreSQL, MySQL, MongoDB, Redis, SQLite, Neo4j, TigerGraph, ChromaDB, pgvector, Kafka, pandas, Power BI, Databricks

Cloud and DevOps: AWS, Azure, Oracle Cloud, Vercel, Render, Linux, Nginx, CI/CD, Kubernetes basics

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) (Amazon Web Services) · Azure Fundamentals (AZ-900) (Microsoft) · OCI Generative AI Professional (Oracle) · OCI AI Foundations Associate (Oracle) · OCI Data Platform Foundations (Oracle) · Fusion Cloud ERP and SCM Essentials (Oracle) · Agentic AI (IBM) · Retrieval-Augmented Generation (IBM) · Multimodal Generative AI (IBM) · Prompt Engineering (Microsoft) · Generative AI Developer (SAP) · Applied Accelerated AI (NPTEL) · Introduction to Machine Learning (NPTEL) · Data Analytics Professional Certificate (Google) · Lakehouse Fundamentals (Databricks) · Data Engineering Foundations (Databricks) · and 18 more.
